George Lardner told me yesterday that the Rockefeller Report is not yet set in type. I'd asked him and Don Rothberg AP if there is to be a press advance. Negative. George's reason for saying not typeset is that yesterday he saw the typescript of it. Did this mean not typeset I asked. He didn t know but saw the point. I reminded him of history of Warren Report and three-day lead time with page proofs and noted selection of Friday and what that means. He saw the point, if he had not on his own and not said it. I did not ask if he was allowed to read the report. Or its size. Apparently it is just to be given out with a press release when there will be no time to read and analyze it
